

AlumaMill™

3825 | 3835 SERIES

Dominates in Aggressive Material Removal Rates

Its design dominates in aggressive material removal rates in high-si aluminum.

Produces Superior Wall Finishes

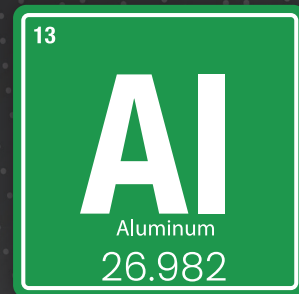

Its high polish and unique cylindrical margin design produce superior wall finishes and prevent material build-up.

Dampens Vibrations

Its cylindrical land provides a smoother finish and dampens vibration in non-ferrous applications.

Frictionless Chip Removal

Available with FC19 coating which helps provide frictionless chip removal.
